董立大教授 (Li-Da Tong) (87 年 6 月畢業，90 年 8 月到校)

(A) 期刊論文

1. **L.-D. Tong**. Automorphisms of neighborhood sequence of a graph. *Taiwanese Journal of Mathematics*, 19(4):1085–1096, 2015. [SCI, NSYSU].

2. T.-P. Chang and **L.-D. Tong**. The hamiltonian numbers in graphs. *ARS Combinatoria*, 123:151–158, 2015. [SCI, NSYSU].

3. T.-P. Chang and **L.-D. Tong**. Choice identification of a graph. *Discrete Applied Mathematics*, 167:61–71, 2014. [SCI, NSYSU].

4. T.-P. Chang and **L.-D. Tong**. The hamiltonian numbers in digraphs. *Journal of Combinatorial Optimization*, 5(4):694–701, 2013. [SCI, NSYSU].

5. A. Raspaud and **L.-D. Tong**. Minimum identifying code graphs. *Discrete Applied Mathematics*, 160(9): 1385–1389, 2012. [SCI, NSYSU].

6. G. J. Chang, T.-P. Chang, and **L.-D. Tong**. The hamiltonian numbers of Möbius double loop networks. *Journal of Combinatorial Optimization*, 23:462–470, 2012. [SCI, NSYSU].

7. T.-P. Chang and **L.-D. Tong**. The hamiltonian numbers of graphs. *Ars Combinatoria,* acceped, 2011. [SCI, NSYSU].

8. Y.-P. Chen, Y.-M. Huang, and **L.-D. Tong**. Rearrangeable nonblocking optical interconnection network fabrics with crosstalk constraints. *IEEE/ACM Transactions on Networking*, 18(5):1413–1421, 2010. [SCI, NSYSU](2009 Impact Factor: 2.051).

9. **L.-D. Tong**. Full orientability of graphs. *Electronic Notes on Discrete Mathematics*, 34:669–672, 2009. [SCI, NSYSU].

10. Hsin-Hao Lai, K. W. Lih, C.-Y. Lin, and **L.-D. Tong**. When is the direct product of generalized mycielski graphs a cover graph. *Ars Combinatoria,* accepted, 2009. [SCI, NSYSU](2009 Impact Factor: 0.396).

11. H.-H. Lai, K. W. Lih, and **L.-D. Tong**. Full orientability of graphs with at most one dependent arc. *Discrete Applied Mathematics*, 157(13):2969–2972, 2009. [SCI, NSYSU](2009 Impact Factor: 0.816).

12. G. J. Chang, C.-Y. Lin, and **L.-D. Tong**. Independent arcs of acyclic orientations of complete r-partite graphs. *Discrete Mathematics*, 309:4280–4286, 2009. [SCI, NSYSU](2009 Impact Factor: 0.548).

13. **L.-D. Tong**. Geodetic sets and steiner sets in graphs. *Discrete Mathematics*, 309:4205–4207, 2009. [SCI, NSYSU](2009 Impact Factor: 0.548).

14. J. T. Hung, **L.-D. Tong**, and H. T. Wang. The hull and geodetic numbers of orientations of graphs. *Discrete Mathematics*, 309:2134–2139, 2009. [SCI, NSYSU](2009 Impact Factor: 0.548).

15. **L.-D. Tong**. The forcing hull and forcing geodetic numbers of graphs. *Discrete Applied Mathematics*, 157:1159–1163, 2009. [SCI, NSYSU](2009 Impact Factor: 0.816).

16. **L.-D. Tong**. The (a,b)-forcing geodetic graphs. *Discrete Mathematics*, 309:1623–1628, 2009. [SCI, NSYSU](2009 Impact Factor: 0.548).

17. **L.-D. Tong** and H. T. Wang. Eccentric spectrum of a graph. *Taiwanese Journal of Mathematics*, 12:969–977, 2008. [SCI, NSYSU](2008 Impact Factor: 0.583).

18. **L.-D. Tong**, P. L. Yen, and A. Farrugia. The convexity spectra of graphs. *Discrete Applied Mathematics*, 156:1838–1845, 2008. [SCI, NSYSU](2008 Impact Factor: 0.783).

19. K. W. Lih, C. Y. Lin, and **L.-D. Tong**. Non-cover generalized Mycielskian, Kneser, and Schrijver graphs. *Discrete Mathematics*, 308:4653–4659, 2008. [SCI, NSYSU](2008 Impact Factor: 0.502).

20. D. Kral, **L.-D. Tong**, and X. Zhu. Upper Hamiltonian numbers and Hamiltonian spectra of graphs. *Australasian Journal of Combinatorics*, 35:329–340, 2006. [NSYSU].

21. K. W. Lih, C. Y. Lin, and **L.-D. Tong**. On an interpolation property of outerplanar graphs. *Discrete Applied Mathematics*, 154(1):166–172, 2006. [SCI, NSYSU](2006 Impact Factor: 0.577).

22. K. W. Lih, **L.-D. Tong**, and W. F. Wang. The linear 2-arboricity of outerplanar graphs. *Ars Combinatoria*, 73:13–22, 2004. [SCI, NSYSU](2004 Impact Factor: 0.178).

23. G. J. Chang, **L.-D. Tong**, and H.-T. Wang. Geodetic spectra of graphs. *European Journal of Combinatorics*, 25(3):383–391, 2004. [SCI, NSYSU](2004 Impact Factor: 0.303).

24. F.K. Hwang, S. C. Liaw, and **L.-D. Tong**. Strictly nonblocking 3-stage clos networks with some rearrangeable multicast capability. *IEEE Transactions on Communications*, 51(11):1765–1767, 2003. [SCI, NSYSU](2003 Impact Factor: 1.665).

25. K. W. Lih, **L.-D. Tong**, and W. Wang. The linear 2-arboricity of planar graphs. *Graphs and Combinatorics*, 19:241–248, 2003. [SCIE, NSYSU](2003 Impact Factor: 0.159).

26. G. J. Chang, **L.-D. Tong**, J. H. Yan, and H. G. Yeh. A note on Gallai-Roy-Vitaver theorem. *Discrete Mathematics*, 256:441–444, 2002. [SCI, NSYSU](2002 Impact Factor: 0.395).

27. **L.-D. Tong**, F. K. Hwang, and G. J. Chang. Channel graphs of bit permutation networks. *Theoretical Computer Science*, 263:139–143, 2001. [SCI](2001 Impact Factor: 0.468).

28. K. W. Lih, **L.-D. Tong**, and J. H. Yan. On cycle sequences. *Graphs and Combinatorics*, 17:129–133, 2001. [SCIE](2001 Impact Factor: 0.205).

29. S.-C. Liu, **L.-D. Tong**, and Y.N. Yeh. Trees with the minimum Wiener numbers. *International Journal of Quantum Chemistry*, 78:331–340, 2000. [SCI](2000 Impact Factor: 1.317).

30. G. J. Chang, F. K. Hwang, and **L.-D. Tong**. The consecutive-4 digraphs are hamiltonian. *J. of Graph Theory*, 31-1:1–6, 1999. [SCI](1999 Impact Factor: 0.544).

31. G. J. Chang, F. K. Hwang, and **L.-D. Tong**. Characterizing bit permutation networks. *Networks*, 33:261–267, 1999. [SCI](1999 Impact Factor: 0.311).

32. G. J. Chang, F. K. Hwang, and **L.-D. Tong**. The Hamiltonian properties of consecutive-3 digraphs. *Math. Computer Modeling*, 25:83–88, 1997. [SCIE].
